Gold Standard

The new *IP Appliance Server™* -
First Behind The Firewall server
with ICO Suite™ and our Semantic
search engine. Genius!

new genus

The **IP Appliance Server™** is the most significant new variety of IP management tools ever cooked up. Another PatentCafe® first, it was specially developed to securely manage your most closely guarded blends and recipes.

Cloned from the genes of our proprietary Web-based ICO Suite and Semantic patent search engine, the IP Appliance Engine lets you store, search, sort and analyze up to 250,000 of your most valuable beans within the safety of your own four walls.

Then again, you would expect nothing less from the Roastmaster that pioneered the integrated patent search & IP management suite.

PATENTCAFE IP APPLIANCE SERVER™

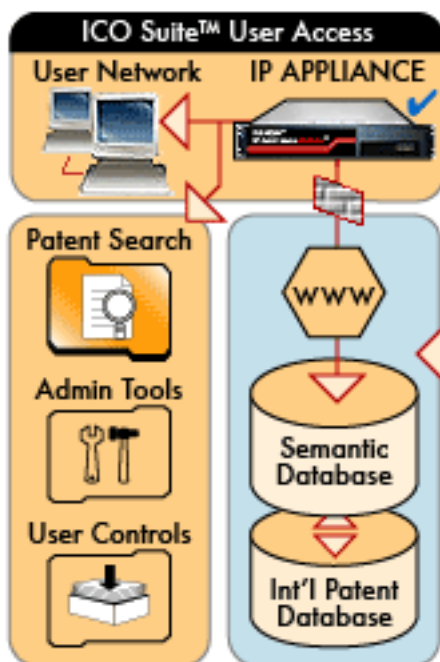

The Intellectual Property Appliance Server is an on-location client version of our Web-based ICO Suite.

Install the IP Appliance Server behind your firewall, and load, search and manage documents you'd never allow to leave your facility - such as invention disclosures, unpublished patent apps, or licensed journal articles and technical literature collections.

The "plug & play" IP Appliance Server comes loaded with our Semantic search solution.

Relevancy-rank your applications for licensability, or search US, PCT and EPO patents for patentability of invention disclosures using full text queries, without ever exposing your in-house documents to the Internet.

The IP Appliance Server is also your network access to our powerful web-based ICO Suite, international patent data center and patent analytics tools. It's the new breed of secure, totally integrated IP solutions!

APPLIANCE SPECIFICATIONS:

Form Factor:

2U, 16.7" x 1.7" x 25.7"
560W redundant hot swap power supply

Intel® 7520 Based Motherboard:

Dual Intel® Xeon® 2.8Ghz
1MB Cache, 800 MHz Front Side Bus
RAM: 3072 MB Total Memory

Data: 3x146GB 10k RPM SCSI disks (RAID 5; 300GB)

System: 2X36GB 10k RPM SCSI (mirrored)

Backup: 300GB SATA

RAID: Zero Channel RAID Controller

Integrated Network Interface:

2 Serial ports
2 x 1 GB Intel® Ethernet Onboard
2 USB ports

Warranty: Standard two-year limited

Document Capacity; License levels for:
50,000, 100,000 or 250,000 Documents

SOFTWARE:

Application:

- PatentCafe ICO Suite™ Appliance Server V.2.0
- ICO Portfolio Manager™ V.2.0

Search:

- Semetric™ Latent Semantic Analysis engine

Server:

- Windows Server 2003, Standard Edition
- MS SQL Server
